# BBS Revolution™

## The Next Generation Bladder Scanner

**BBS Revolution™** is the easiest to use bladder scanner on the market. Fast and accurate measurements are taken with just 3 simple steps:

- Lift the wireless probe and apply gel
- Place on the lower abdomen
- Press the button to take measurement

*There is no need to select modes or aim the probe – it is just ONE and DONE – when using the BBS Revolution™!*

### Testimonial

*We now have five BBS Revolution scanners within MEHT and all of them have been well received by the clinical staff. I have spoken to various staff members that use this device and all confirm that it is easy to use, accurate and reliable. This device is now to be a part of MEHT's standardisation programme in respect to medical devices. Thanks for all your support.*
