

“Helping you to care”

AvantSonic Z3

Automatic Real-Time 3D Bladder Scanner

Easy to use AvantSonic Z3 features real-time scanning modes with pre-scan for operators with and without bladder scanning experience. Expert Mode is designed for experienced operators, whilst the Easy Mode is perfect for those without prior experience.

Smart probe positioning system aids the operators during bladder location. Advanced image processing technique and sophisticated algorithm work together to deliver fast and accurate results and display them on the colour touch screen.

The scanner comes with unlimited distance training delivered remotely. Calibration and servicing are not required, thus reducing downtime and costs of maintenance.

Light and portable, the AvantSonic Z3 Bladder Scanner is usable conveniently with or without a trolley on wheels with basket, making it a perfect choice for use in hospitals and clinics and for scanning on the go.
