Fast acting, highly effective and 100% Vegan, the innovative BIOFROST® Active Gel is a Cruelty Free product not been tested on animals.

BIOFROST® Active summary

- Drug-free dual-action cooling and warming topical gel
- Indicated for temporary muscle and joint pain relief
- Promotes muscle recovery and joint mobility
- Contains only safe and natural ingredients
- Enriched with herbal extracts
- Especially effective for back pain
- Fast-acting with lasting effects
- Usable standalone and alongside other therapies

After application of BIOFROST® Active, the cooling sensation is felt within one minute, whilst the warming effects commence shortly after. Dual-action gel decreases skin surface temperature, simultaneously creating heat sensation. The dual-action effects disrupt, displace and weaken pain signals travelling to the brain for temporary pain alleviation.

Cooling healing action of the BIOFROST® Active gel temporarily constricts superficial blood vessels in the skin and reduces blood flow to the treated area. When skin temperature rises again, the superficial blood vessels dilate, allowing the increased blood flow to deliver fortifying metabolism-enhancing oxygen and nutrients to the area to boost body's own healing processes.

BIOFROST® Active is perfect for people wishing to relieve painful musculoskeletal pain and discomfort safely and effectively with natural drug-free topical formulations. BIOFROST® Active is perfect for the elderly and disabled people, convalescing patients and others looking for a respite from debilitating discomfort and aches.
