

CareZips®

Innovation Improving
the Dignity of Patient Care

CareZips Incontinence Dignity Trousers

CareZips are patented everyday wear trousers that improve comfort and dignity of incontinent people.

Fitted with unique 3-zip fastening system, the CareZips make changing of personal incontinence pads, diapers and absorbent briefs faster and easier for the carers, whilst improving dignity and comfort of the patients.

CareZips Incontinence Trousers feature 3 strategically positioned zips that open the trousers from the waist to the knees for quick and easy access to the abdomen and crotch, when changing briefs and diapers, catheters, collection bags and pouches. No need to undress or pull the trousers down.

CareZips Incontinence Trousers deliver all round more pleasant experience for all. Less exposure and more dignity for the users. Less back strain and significant timesaving for the carers.

CareZips are unisex and made in 7 sizes and 2 colours (i.e. navy and taupe). Wrinkle resistant with stretch for extra comfort, washable and non-iron, the CareZips are perfect for wear day after day.

When worn over incontinence compatible hip protectors (i.e. HipSaver QuickChange, HipSaver OpenBottom, HipSaver EasyFit), the CareZips Incontinence Trousers improve dignity and comfort as well as help to prevent fall related hip fractures commonly occurring in the vulnerable incontinent people.
