HeadSaver Soft Head Protector

HeadSaver – Tested and Validated Soft Head Protector for the Elderly and Disabled People – Protects Vulnerable People from Fall Related Head Injuries

Falls, trips and slips are common amongst older people and frequently result in serious injuries or fractures.

HeadSaver Soft Head Protector is a stylish and comfortable head protector intended to protect the head and scalp of the elderly people from fall related impact forces. HeadSaver is a Class 1 Medical Device.

HeadSaver Soft Head Protector has been tested for impact and proven to reduce the magnitude of impact forces arising during accidental head collisions with objects, such as forces generated during accidental falls, knocks and bumps.

HeadSaver Soft Head Protector is suitable for older adults (men and women) at risk of falling, including the elderly men and women in care home settings as well as the elderly people, who live independently or receive care in their own homes.

HeadSaver can also help to protect people suffering with medical conditions that cause problems with balance and steadiness (i.e. epilepsy, Parkinson’s disease, Cerebral Palsy).

HeadSaver protective helmet is available in 2 adjustable sizes (S/M for 52 – 56 cm head circumference; M/L for 57 – 62 cm head circumference). Detachable chin strap with clip for extra security is provided with each HeadSaver Soft Head Protector.

HeadSaver Soft Head Protector can be worn on its own as a protective helmet or with a specially designed Head Covering for greater discretion. There is a choice of 3 different coverings in one universal size (1 for ladies, 1 for men, 1 unisex).
