## INNOVATIVE BUSINESS MODEL

Hospiflow is marketed with a capital equipment pricing model as well as an annual software license model.

Customers can choose between an upfront investment and annual payment for a software license.

The advantages of Minze's licensing model are:

- + in business at a very low price,
- + lower operational costs in the first years of use,
- + flexible license price depending on number of uroflow tests per year,
- + free software upgrades.
